

How to install Complete Concierge

Jul 31, 2017 | IP PBX Documentation, VoIP Knowledge Base

You can install the Complete Concierge on the PBX as follows:

1. Copy the complete_concierge-3.0.7.tgz to the /var/www/html/admin/modules folder

http://updates.xorcom.com/servers/complete-concierge/complete_concierge-3.0.7.tgz

```
cd /var/www/html/admin/modules
wget http://updates.xorcom.com/servers/complete-concierge/complete_concierge-3.0.7.tgz
```

2. Install the module:

```
tar xzf complete_concierge-3.0.7.tgz
/var/lib/asterisk/bin/module_admin install complete_concierge
/var/www/html/admin/modules/complete_concierge/cc_inst.sh
amportal chown
sudo -u asterisk /var/lib/asterisk/bin/retrieve_conf
sudo -u asterisk /var/lib/asterisk/bin/module_admin reload
```

3. Start the services

```
/etc/init.d/pbillx start
```

Check that all four services (pbFIAS,pbExec,pbCalc,pbStarter) have started:

```
# ps aux |grep pb
root      5718  0.5  0.8 16944  8288 pts/0    S    07:54   0:00 /var/www/html/admin/modules/complete_concierge/resources/pbFIAS
root      5719  0.5  0.8 17468  8252 pts/0    S    07:54   0:00 /var/www/html/admin/modules/complete_concierge/resources/pbExec
root      5720  0.8  0.7 24088  7408 pts/0    S    07:54   0:00 php -q /var/www/html/admin/modules/complete_concierge/resources/pbCalc
root      5721  0.5  0.7 16664  8192 pts/0    S    07:54   0:00 /var/www/html/admin/modules/complete_concierge/resources/pbStarter
```

4. Enable access to the PBX 3306/tcp port in the PBX firewall

5. Download and install the CompleteConcierge Configuration utility on a Windows computer:

<http://updates.xorcom.com/servers/complete-concierge/XorcomAdmin.exe>

That's all.
